

► **Shape your future with wpd wind power!**
Work to change the world with renewable energy.

Future energy production will be carbon dioxide free all around the world including Finland. Wind power is major contributor to achieve this target.

The wpd-group actively takes part in shaping this change with about 2000 employees around the world. We have become a major player in over 18 different countries by specializing in planning, financing, constructing and operating of wind parks.

In Finland wpd have constructed three wind farms with combined output over 140MW, this equals over 20 000 houses' annual electricity consumption. In addition, wpd Finland have more than 10 wind farms under development.

With respect to our business activities in Finland we are searching for a

Civil engineer for construction layout, tendering and site management of our wind energy projects in Ostrobothnia area, Finland.

Your tasks

You are in charge of the construction phase of our wind farm project in the area of Ostrobothnia. This does include the on-site pre-construction analysis, the tendering of the subsections, the construction site management, the coordination of various sub-contractors, authorities and other stakeholders as well as the controlling of the construction phase. You will lead the site team towards a turn-key wind farm. You will also be in contact with our wind park development team in Espoo and therefore there are time periods when you will be in Espoo office.

Your profile

- You have successfully completed your studies of civil engineering and have already gained at least 5-10 years of professional experience in construction site management in Finland and/or in Scandinavia, ideally in the field of wind power.
- You are used to work with tight schedules and have track record of different challenges.
- You have the ability to work independently but are still a team player.
- You already gained intercultural competence and experience.
- You are quality driven and have health, safety & environment mind set
- You are fluent in Finnish and English. Knowledge of the German language would be an advantage.

We offer ...

- support and expertise of one of the biggest European companies in field of wind project development.
- Unique opportunity to participate in the expansion of a bigger global player in renewable energies, in the Finnish market
- integration in a very motivated and positive spirited team.
- the possibility of developing your skills in a wide range of complex tasks.

We are looking forward to your application with salary proposal and your CV the soonest, but no later than **May 30th, 2018**.

The Position will be filled at the earliest convenience, **latest September 18th 2018**.

Please send your application to: [info\(at\)wpd.fi](mailto:info(at)wpd.fi)
